REQUEST FOR PROPOSAL WEBSITE

Mennonite World Conference (MWC) is a community of Anabaptist related Churches and a registered charity in Canada and the United States. MWC is present in 58 countries and operates in multiple languages and currencies.

MWC's current website uses Drupal 7 platform. We are inviting proposals for a new website that will be implemented in the fall of 2024. Proposals should include the following information:

- Platform
- Solution – see website criteria below
- Delivery approach & projected timelines
- Cost estimate and payment plan
- Your fit for this project
- References

Website criteria:

- **Multilingual** - MWC operates in English, French and Spanish. In addition, MWC sometimes operates in other languages, e.g. Amharic, Indonesian, Hindi. Some of the other languages require special characters.
- **Multicurrency** – MWC operates in several currencies including USD, CAD, Euros, COP, INR, IDR, ETB, etc.
- **Global map integration** with database that displays the data of conferences and member churches with member data.
- **Website groups** of users and content.
- Seamless **online donations**.
- Close **integration with CRM** (Donor Builder).
- **Integrate webforms** which are connected to CRM. Examples of webforms are publication sign-up, donate page and webinars.
- Additional modules should be compatible with the interface.
- **Optimized for mobile devices**.
- **Social media integration** for Facebook, Instagram, YouTube, and X (Twitter) feeds.
- **Media management** – stream video, media/file browser, etc.
- **Content migration**.

Updated Jan 15, 2024

Following *Jesus*, living out *unity*, building *peace*

- **Support resources with different structures and formats**, with file types like jpg, PDF, Pptx, docx, xlsx, video, and the potential of importing images from Flickr.
- **Strong captcha** is needed for publications signups to avoid spam signups.
- **Location detection** of device to display in relevant language. For example, if someone opens it in Bogota, then it directly opens with a Spanish home page for a user-friendly experience.
- **Accessible to anonymous users** but should also have the option of private pages for logged in members.
- **Customize the user roles** based on several levels of administrative permissions needs.
- **Software version and security updates** should be added from time to time and installed after proper testing.
